DANISH FARMAN

JUNIOR AI / MACHINE LEARNING ENGINEER

Islamabad, Pakistan | +92 370 5161245 | danishfarman1910@gmail.com
GitHub: github.com/danishbhi29 | LinkedIn: linkedin.com/in/danish-farman-1ba091324

PROFILE

Early-career AI/ML engineer and BS Software Engineering graduate from International Islamic University Islamabad (2026). Builds Python-based machine learning and LLM applications, including NLP classification, multimodal modeling, retrieval-augmented generation, and agent workflows. Combines model development with API and full-stack integration; seeking a junior AI Engineer or Machine Learning Engineer role.

TECHNICAL SKILLS

Programming: Python, SQL, C++
AI / Machine Learning: PyTorch, scikit-learn, TensorFlow/Keras, NLP, supervised learning, feature engineering, model evaluation
LLM Applications: LangChain, LangGraph, RAG, AI agents, prompt engineering, embeddings, ChromaDB, LLM APIs
Backend / Data: FastAPI, REST APIs, Pandas, NumPy, MongoDB, Supabase, PostgreSQL
Tools / Automation: Git, GitHub, n8n, React, Hugging Face, Playwright

SELECTED PROJECTS

MindSense | Multimodal Emotional Wellness Screening | First Position, 2025–2026
React, TypeScript, FastAPI, PyTorch, RoBERTa, OpenFace, OpenSMILE, Supabase, PostgreSQL

- Designed a multimodal screening platform that combines text, audio, and facial signals for PHQ-8 score prediction.
- Built a PyTorch gated-fusion model to combine RoBERTa, OpenFace, and OpenSMILE feature representations.
- Integrated the model into a FastAPI and Supabase application with PostgreSQL Row-Level Security for user data.

IMDb Movie Review Sentiment Analysis | NLP Project
Python, Hugging Face Datasets, Pandas, NLTK, scikit-learn, TF-IDF

- Explored the Stanford IMDb review dataset and prepared text features using cleaning, stop-word handling, and TF-IDF.
- Trained and compared Logistic Regression, Multinomial Naive Bayes, Linear SVM, and SGD classifiers; evaluated accuracy, precision, recall, and F1.

Personal AI Agent | Python, Gemini, LangChain, MCP

- Built a command-line assistant with tool calling for calculations, weather, system information, and local tasks; added MCP integration and a workspace-restricted terminal.

EXPERIENCE

AI/ML Engineer Intern | *Parallax Labs* | *Remote*
Built machine-learning and deep-learning models for computer vision and predictive analytics, and exposed model functionality through FastAPI REST APIs.

AI/ML Intern | *Sigma Evolution Pvt. Ltd.* | *Remote*
Developed AI/ML modules and integrated trained models into full-stack applications and backend systems.

AI Automation Intern | *Devrolin*
Created n8n workflows integrating APIs and AI services to automate data processing, notifications, and repetitive tasks.

EDUCATION & CERTIFICATIONS

BS Software Engineering | International Islamic University Islamabad | 2022–2026
Coursework: Data Structures and Algorithms, Databases, Artificial Intelligence, Software Engineering, Web Technologies
Certifications: Machine Learning with Python (Coursera); Advanced Machine Learning (NAVTTC)
Languages: Urdu (native), English (good)
